Introduction

Introduction

The Department of Education is pleased to present this document, the *1989-90 Superintendent's Annual Report*, which represents a major change in the reporting of educational statistics in the Commonwealth.

The changes in this document reflect the changes in the Virginia Department of Education during the time this document was being prepared. In response to the Department's revised mission to provide "essential educational services" to local schools, we have combined two previous Department documents, *Facing Up* and the *Superintendent's Annual Report*, which duplicated much of the same material. We hope this results in clearer, more accessible information on Virginia's public schools.

In addition, this document was prepared using the Department's team approach. Representatives from Information Systems, Evaluation and Testing, Finance, Public Affairs, and others collaborated on the design, content, and production of this report. This collaborative approach hastened the combination of the two previous reports, and resulted in significant cost savings to the Department.

The first *Superintendent's Annual Report* was published in 1870 when the state's public school system began. *Facing Up* was first published in 1967 to provide selected statistical data about Virginia's public schools.

The first portion of this report is Highlights from the 1990 Report of the Virginia Board of Education, *Turning the Page*. The second portion consists of 19 statistical tables presenting information for the 1989-1990 school year.

Joseph A. Spagnolo, Jr.
Superintendent of Public Instruction

The following is a synopsis of the changes made from the previous publications Facing Up and the Superintendents Annual Report:

Turning the Page —
Highlights from the 1990 Report on Public Education

Virginia has turned a page in education. During the past three years, the Commonwealth has been involved in implementing a great many educational reforms—many of which were suggested by the 1986 Governor's Commission on Excellence in Education. These reforms have, for the most part, been accomplished. The Virginia Board of Education began the year by looking at a "report card" on the education activities, progress, and accomplishments of the past several years.

But amid the congratulations for a job well done—and many feel it *has* been done well—educational leaders have been brought up short by the problems that remain. Some of these problems—geographic disparity, drug abuse, minority achievement, etc.—appear almost unsolvable.

Because of the serious nature of the problems, this year has been one of sober reflection for the Board of Education. During a three-day meeting in Charlottesville in April, the board crafted a new vision statement for public education; and a new mission statement for itself. In addition, the board agreed on three key issues—disparity and diversity, the teaching profession, and accountability—to which it would devote its energies in the months ahead.

Finally, 1990 has been a year of transition and changing leadership. A new administration has brought with it a new perspective on the issues involving public education. In the last twelve months, the top four educational policy leaders for the state—the governor, secretary of education, president of the state board, and superintendent of public instruction—have changed. These new people are bringing fresh ideas and energy to the cause of public education.

As in previous years, the board is using this report to highlight the progress of educational reform in Virginia. As president of the Board of Education, it is my duty to report on the condition of education to the Governor, General Assembly, and to all Virginians. On behalf of the board, I offer this 1990 report as an addition to the serious discussion on education reform which is continuing throughout the Commonwealth.

Suzanne F. Thomas
President
Virginia Board of Education

Joseph A. Spagnolo, Jr.
Superintendent of Public Instruction

"The trick is to get everyone—the Governor, the Secretary, the Board of Education, the Virginia Education Association, and others—on the same wave length, and committed to the same ideals . . ."

Earlier this year, Governor L. Douglas Wilder and Secretary of Education James W. Dyke, Jr. searched for a state superintendent of education who was keenly interested in correcting disparities among rural and urban schools, doing a good job of educating children from low-income and troubled families, and expanding drug education. They sought someone with solid budget experience, since budget issues are likely to be paramount at the Department of Education over the next few years.

In Lynchburg, they found Joseph A. Spagnolo, Jr. He was head of a prospering 10,000-pupil school system where the dropout rate had fallen from 7.3 percent to 3.1 percent under his leadership. His priorities included instituting programs for at-risk four-year-olds and meeting the needs of high-risk pupils. A governor's magnet school for science and technology was doing well in that region.

Spagnolo became Virginia's superintendent of public instruction July 1, succeeding S. John Davis.

Spagnolo was superintendent of Lynchburg Public Schools for 17 years. He holds bachelor's and master's degrees from Fairleigh Dickinson University in his native New Jersey, and began his career as a biology teacher in his home state. In 1966 he came to Virginia to teach at Henrico High School. He was assistant principal at Buford Junior High in Charlottesville, and then principal at Providence Junior High in Chesterfield. In 1971, Spagnolo earned a doctorate in education at the University of Virginia. The same year, he was named assistant superintendent of business and finance for Henrico County Schools. Two years later he was appointed superintendent in Lynchburg.

A principal who worked under Spagnolo says: "He creates an atmosphere in which the people under him are willing to try new things." The new state superintendent adds: "You've got to establish ideas and form programs, then convince everybody it's the right way to go . . . If you get everybody rolling in the same direction . . . the problem won't be as tough to solve as it might seem."

The State Responds to the Disparity Issue

The Virginia Board of Education in January adopted a resolution calling for a study of educational disparity throughout the Commonwealth. The resolution, which passed unanimously, called for the board to "communicate this concern regarding disparity of educational opportunities to the governor, General Assembly, and the secretary of education."

The resolution also called for the state to study the ways in which disparity adversely affects students and schools, and to develop recommendations for the reduction of disparity.

Several days later, Governor Wilder issued executive order number four, creating the 21-member Governor's Commission on Educational Opportunities for All Virginians. The governor had signaled his intent to name the commission in his State of the Commonwealth Address. This commission, headed by former state board member W.L. Lemmon, was to consider and recommend actions, both programmatic and fiscal, that could further address and overcome disparities in educational programs in Virginia's public schools.

Board President Suzanne F. Thomas, Vice-President Frances A. Lewis, and member Thomas Gorsuch were among those appointed to the commission. The governor asked that the commission deliver its report before the end of February 1991. The commission, however, has promised to issue an interim report in preparation for the 1991 General Assembly session.

In the intervening months, the full commission has held hearings throughout the state, gathering information, comments, and perspectives on the problem. The commission has divided its work into three committees: fiscal equity, program equity, and pupil equity.

Fiscal equity

The fiscal equity committee of the governor's commission is developing recommendations about the funding of public schools. Some of the issues the committee is struggling with include:

- What is a reasonable way of determining the costs of the foundation program? (as defined by the Standards of Quality)
- How should this cost be apportioned and how should the state's share of the costs be distributed?
- Should the state provide support for capital construction and debt service costs?

Program Equity

The program equity committee is focusing on the differences between school divisions and the quality and scope of the educational programs offered. There appears to be a "disparity of inputs"—course offerings, equipment and materials, condition of school buildings, etc.—that limits the educational opportunities. The key issue is, "what educational program should be available to all students." The committee also is trying to find out what model programs exist in Virginia and other states.

Pupil Equity

Educators and policy leaders recognize that many factors can influence success in school. The changing family structure, global upheaval, and socioeconomic conditions are producing an increasingly diverse student population—with increasingly diverse needs. There is a strong feeling that public schools must do whatever they can to minimize the relationship between personal circumstance and the results of schooling.

The pupil equity committee is responsible for studying students who need special services and compensatory programs from the public schools. The committee is investigating a whole host of issues as diverse as the children who are in need: early childhood programs, family involvement, dropout prevention, student ability group "tracking," after-school day care, English as a second language, student health and nutrition, etc.

April 1990: The Board Conference is Held

This year's annual Board of Education retreat stands out as a significant event in the recent history of education reform in Virginia. During three days of meetings in Charlottesville, board members shaped a new direction for schools in the Commonwealth.

First, the board crafted and approved a vision statement for education. This vision statement is designed to inspire educators to what is possible. Next, the board drafted a mission statement outlining its role in education.

Finally, the board selected three "focus areas" to study during the next two to three years. Board members agreed to spend at least 30 percent of their time discussing issues in accountability, diversity and disparity, and the teaching profession.

In following months, the board has worked with department staff to further define the focus areas. The board grouped itself into three "focus groups," that have met regularly to study the issues. Specific Department of Education professionals have been assigned to staff each focus group.

Accountability

The board members looking at accountability are closely watching the progress of the Educational Performance Recognition Program (EPR). This program, which was approved for pilot testing last year, is designed to reorient school accountability away from *input* measures like per pupil expenditure and the number of guidance counselors per 100 students. Instead, EPR measures the *outcomes* of schooling by using more than 60 specific indicators of student performance.

The Department of Education is progressing in its implementation of the EPR program. The department has hired a full-time supervisor for the program, who has gradually assumed day-to-day direction of EPR. All the schools are collecting and providing data for the first year pilot test of the program. The first year results are expected to be reported to the board by March of 1991.

The Teaching Profession

Last year, the board appointed a broad-based task force to study the teaching profession and to offer recommendations to the board as to how the status and image of teachers could be improved. The task force was led by a prominent academician, Dr James M. Cooper, dean of the Curry School of Education at the University of Virginia. The task force included representatives from many constituencies, including teachers, principals, superintendents, parents, local government officials, and school board members.

The task force has gathered information on a wide range of issues, including salary, working conditions, recertification, teacher recruitment, etc. The task force delivered its report to the board in September, and the board was expected to begin acting on the recommendations throughout the end of 1990 and into 1991.

Diversity/Disparity

The board's focus group on diversity and disparity has closely monitored the work of the governor's commission. The focus group members are taking time to study the issues relating to disparity. When the commission issues its report, the focus group members feel they will be ready to respond with specific recommendations and plans.

July 1990: Spagnolo is Appointed State Superintendent

In June, Governor L. Douglas Wilder ended months of speculation and appointed Joseph A. Spagnolo, Jr., of Lynchburg, as state superintendent of public instruction

In his first few weeks as state superintendent, Dr. Spagnolo met with hundreds of people, including department employees, state leaders, and legislators. He traveled throughout Virginia and interviewed scores of educators to assess the image and role of the Department of Education.

Spagnolo at once began to work with the employees of the Department to establish a contemporary mission and goals for the agency.

On September 5, Spagnolo announced a plan to re-define the Department of Education, and to transform it from a predominantly regulatory agency to a service-oriented one. His intent is to make it less bureaucratic, and more responsive to the a of local educators; less preoccupied with rules and regulations, and more focused on offering expert assistance to school divisions.

A major emphasis at the department is to be on research, with the elements of research, policy development, and budget linked. There will also be increased emphasis on accountability. The plan calls for limiting the agency's scope to programs for school-age children; others, such as adult literacy, adult education, and veterans' education, would be transferred to other state agencies.

The Board of Education approved the plan unanimously.

Spagnolo told the board, "We took a long, hard look at what we were doing and decided that the approach needed to be different.... We made a determination that the department needed to be a service-oriented, research-based entity that is committed to improving learning."

The plan is expected to be implemented over the next several months.

The Mission of the Virginia Board of Education

The mission of the Board of Education is to ensure for all children in the Commonwealth an education that enables them to become informed and productive citizens in a democratic society. In keeping with Article VIII of the Constitution of Virginia, the Board established standards of quality, subject to revision only by the General Assembly, and exercises general supervision of the public school system.

The Board has primary responsibility and authority for establishing educational policy. To that end, the Board provides leadership and actively involves citizens and school divisions in formulating the policies necessary to meet its educational commitment.

adopted April 1990

The Vision of Education in Virginia:

Every child can learn.

Each child has unique talents which our schools must identify and develop.

The Commonwealth's most important investment in the present and in the future is to provide for all its children an education based upon excellence and equity.

[1] Standard 1 G of the *1988-90 Standards of Quality* states in part that certified instructional personnel shall be assigned by each school board in a manner that produces a division-wide ratio of pupils in average daily membership to full-time equivalent teaching positions excluding special education teachers, principals, assistant principals, counselors, and librarians, that are not greater than the following ratios: >25 to 1 in grades K–6; 24 to 1 in grade 1; and 24 to 1 in all English classes grades 6–12.

[2] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[3] Bedford County data include Bedford City.

[4] Fairfax County data include Fairfax City.

[5] Greensville County data include Emporia City.

[6] Williamsburg City data include James City County.

State As a Whole	58	55	72	53	54	62	60	62	61	68

---

[1] Listed in this table are the division-by-division and statewide results from the Virginia State Assessment Program. The results are reported in percentile equivalents of average scores; *i.e.*, the average scores (for a division or the State) are compared with the scores of a national norm group (national sample of students). A percentile equivalent of 54 indicates that the average score is higher than the scores of 54 percent of students in the national norm group and that 46% scored as well or better. The 50th percentile represents an average score for students nationwide. Test scores are not precise measurements; therefore, differences of several percentile points may not be significant.

[2] The *Cognitive Ability Tests* are designed to appraise individual differences in cognitive abilities related to school tasks.

[3] The *Iowa Tests of Basic Skills* and the *Tests of Achievement and Proficiency* are test batteries designed to measure a student's status in the major skill and content areas.

[4] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[5] Bedford County data include Bedford City.

[6] Fairfax County data include Fairfax City.

[7] Greensville County data include Emporia City.

[8] Halifax County data for grades 8 and 11 include South Boston City.

[9] Rockbridge County data for grade 11 include Lexington City.

[10] Williamsburg City data include James City County.

---

[1] No adjustments have been made to reflect the mobility of the population.
[2] Data include summer, 1990 graduates.
[3] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.
[4] Bedford County data include Bedford City.
[5] Fairfax County data include Fairfax City.
[6] Grayson County data include the Town of Fries. Effective with the 1987-88 school year, the Town of Fries discontinued operating as a separate school division and was merged with Grayson County.
[7] Greensville County data include Emporia City.
[8] Halifax County data include South Boston City.
[9] Northampton County data include the Town of Cape Charles. Effective with the 1988-89 school year, Cape Charles discontinued operating as a separate school division and was merged with Northampton County.
[10] Rockbridge County data include Lexington City.
[11] Williamsburg City data include James City County.

[1] Beginning in the 1988-89 school year, dropouts are defined as pupils in grades 7-12 and ungraded pupils ages 12 and older who withdraw from school for reasons other than promotion, transfer, death, or graduation, and do not enter another school during the school year. Also included are pupils who are in attendance on the last day of the school year who fail to return to school by October 31 of the following school year, the "summer dropout." Prior to 1988-89, pupils in grade 7 and pupils who dropped out between regular term sessions (summer dropouts) were not included in the count of dropouts. The dropout rates presented for 1989-90 do not compare to rates published prior to 1988-89.

[2] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[3] Bedford County data include Bedford City.

[4] Fairfax County data include Fairfax City.

[5] Greensville County data include Emporia City.

[6] Halifax County data include South Boston City data for grades 8-12.

[7] Nelson County data include corrections to the original submission of dropout data.

[8] Rockbridge County data include Lexington City data for grades 9-12.

[9] Williamsburg City data include James City County.

[1] Operations include regular day school, school food services, summer school, adult education, and other educational programs, but do not include capital outlay, debt service, and refunds.

[2] Sales tax amount for the fiscal year is determined by month of receipt, not month of collection.

[3] Support by sources may not equal total expenditures due to rounding.

[4] Beginning in 1987-88, expenditures made by the local school divisions on behalf of state operated education programs (hospitals, clinics, and detention homes) located within the local school divisions are no longer included in total expenditures for operations for the local school division.

[5] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[6] Bedford County data include Bedford City.

[7] Greensville County data include Emporia City.

[8] Williamsburg City data include James City County.

[1] As required by the Appropriations Act of the 1988 General Assembly.

[2] Effective with the 1988-90 biennium, the Appropriations Act specifies that Adjusted Gross Income is to replace Personal Income as a component on the Local Composite Index.

[3] The Local Composite Index is multiplied by .48, as specified in the Appropriations Act of the 1988 General Assembly for the 1988-90 biennium. There is also a provision that a locality whose composite index multiplied by .48 exceeds .8000 shall be considered as having an index of .8000 for purposes of distributing basic aid payments.

[4] The data have been adjusted to reflect the following annexations: Waynesboro-Augusta County (Effective 01/01/86); Franklin City-Southampton County (Effective 01/01/86); Staunton-Augusta County (Effective 01/01/87); Danville-Pittsylvania County (Effective 01/01/88); and Emporia-Greensville County (Effective 01/01/88).

[5] Basic School Aid Funds were calculated for Grayson County using the composite index of .2590 as a result of the previous year's merger of the Town of Fries with Grayson County. This is provided for under the 1988-90 biennium Appropriations Act which states: In the event that two or more school divisions become one school division, whether by consolidation of only the school divisions or by consolidation of the local governments, such resulting division shall be paid Basic Aid for all pupils in the combined division on the basis of a composite index determined by the Board of Education, which shall not be less than the lowest nor higher than the highest composite index of any of the individual school divisions involved in such consolidation.

[6] A provision of the 1988-90 biennium Appropriations Act specifies that an adjustment is made to limit to .04 the composite index increase resulting from the substitution of Adjusted Gross Income for Personal Income in the distribution formula. This provision was applicable to the following school divisions with the resulting indexes used for distribution of basic school aid funds: Fauquier County - .6314; James City County - .6047; Bristol City - .4552; and Waynesboro City - .5380.

[7] As noted in Footnote 4, Danville and Emporia were involved in annexations that were effective 01/01/88. All data used in the composite index calculations as adjusted for the annexations were not available until several months in the fiscal year. Therefore, by mutual agreement between the Department of Education and the two cities, composite indexes of .3666 for Danville and .3992 for Emporia were used to allow proper budgetary planning.

CALCULATION OF THE COMPOSITE INDEX OF LOCAL ABILITY-TO-PAY

$$.5^{*}\left[\frac{\dfrac{\text{Local True Value of Real Property}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Local True Values of Real Property Statewide}}{\text{Total Average Daily Membership Statewide}}}\right] + .4^{*}\left[\frac{\dfrac{\text{Local Adjusted Gross Income}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Adjusted Gross Income Statewide}}{\text{Total Average Daily Membership Statewide}}}\right] + .1^{*}\left[\frac{\dfrac{\text{Local Taxable Retail Sales}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Taxable Retail Sales Statewide}}{\text{Total Average Daily Membership Statewide}}}\right] = \begin{array}{l}\text{Average Daily}\\ \text{Membership}\\ \text{Composite}\\ \text{Index}\end{array}$$

$$.5^{*}\left[\frac{\dfrac{\text{Local True Value of Real Property}}{\text{Local Population}}}{\dfrac{\text{Total Local True Values of Real Property Statewide}}{\text{State Population}}}\right] + .4^{*}\left[\frac{\dfrac{\text{Local Adjusted Gross Income}}{\text{Local Population}}}{\dfrac{\text{Total Adjusted Gross Income Statewide}}{\text{State Population}}}\right] + .1^{*}\left[\frac{\dfrac{\text{Local Taxable Retail Sales}}{\text{Local Population}}}{\dfrac{\text{Total Taxable Retail Sales Statewide}}{\text{State Population}}}\right] = \begin{array}{l}\text{Per Capita}\\ \text{Composite}\\ \text{Index}\end{array}$$

$$\left[.6667 \times \text{Average Daily Membership Composite Index}\right] + \left[.3333 \times \text{Per Capita Composite Index}\right] = \begin{array}{l}\text{Local}\\ \text{Composite}\\ \text{Index}\end{array}$$

*The constants (.5, .4, and .1) represent the average share of local revenues gathered from real property taxes, charges and miscellaneous revenue, and the 1 percent local option sales tax, respectively. Adjusted gross income data are used in the above formula as a proxy for the taxes derived from local charges and miscellaneous revenue because detailed information on the latter is not available. This is specified in the Appropriations Act.

Appendix

Explanation of Tables and Columns
Fiscal year 1989-90

TABLE 1

Represents membership data reported to the Department of Education (the Department) at different points during the year. September 30 Membership is the sum of pupils present and absent on September 30 or the school day closest to September 30. End of Year Membership is the sum of the pupils present and absent on the last day of the school year.

TABLE 2

Represents pupil teacher ratios calculated under different criteria. "Teachers" represent classroom teachers, guidance counselors, and librarians. Ratio of Pupils to Instructional Personnel K-6, Pupil Teacher Ratio Grade 1, and Pupil Teacher Ratio English 6-12 are reported to the Department by the localities.

TABLE 3

Represents the number of pupils promoted as a percentage of end of the year membership. These amounts are reported to the Department by the localities.

TABLE 4

Represents the results from the Virginia State Assessment Program. Amounts are reported to the Department by the localities.

TABLE 5

Represents the number of graduates as a percentage of ninth grade membership four years earlier, and the type of diploma awarded. Also included in the table is the percentage of graduates that pursued continuing education and the type of education pursued. Amounts were reported to the Department by the localities.

TABLE 6

Represents a new table to the Superintendent's Annual Report and reflects a percentage of dropouts compared to membership in grades 7-12 as reported by the localities. The data reported to the Department is broken down by ethnic category.

TABLE 7

Represents an age/grade distribution of pupils by the age they entered the grade and the number of pupils promoted and retained by grade.

TABLE 8

Represents the number of days taught, the average daily membership, and the average daily attendance along with the percentage of attendance to membership. Average Daily Membership (ADM) is the average number of pupils belonging each day in a room, school, or school system for the period of report. ADM is determined by dividing the sum of the days present and absent of all pupils when school is in session during a given period by the number of days school is in session during this period.

TABLE 9

Represents balances, receipts and disbursements recorded on the State's records for programs in support of education in the Commonwealth. The amounts represent payments directly to the localities along with the expenditures in support of the Department, reported by program.

TABLE 10

Represents activity for the year in the Literary Fund of Virginia.

TABLE 11

Represents expenditures at both the state level and the local level for programs. Amounts at the state level represent expenditures at the Department in support of educational programs. Amounts at the local level are accumulated from the Annual School Report by functional area.

TABLE 12

Represents a breakdown of receipts at the localities as reported on the Annual School Report revenue section by major revenue classification. Balances represent the total amount of balances at the localities at the start of the fiscal year. State Sales and Use Tax is the 1 cent tax on goods and services allocated to the localities. State Funds are funds appropriated by the General Assembly and sent to the localities by the Department. Federal Funds are funds for federal programs or grants sent directly to the locality by the Federal Government or through the Department to the locality. City, County and Town Funds are local appropriations for education for operations, capital outlay, and debt service. Other Funds includes such items as tuition from private sources, food service receipts, transportation revenues, rebates and refunds, receipts from other LEAs, agencies, etc. Loans, Bonds, Etc are proceeds from bond sales, Literary Loan Fund loans and interest.

TABLE 13

Represents expenditures by functional area as reported on the Annual School Report. Administration involves activities concerned with establishing and administering policy for operating the Local Education Agency (LEA) and is comprised of Board Services, Executive Administration, Information Services, Personnel, Planning Services, Fiscal Services, Purchasing, Reprographics and Data Processing.

Instruction includes the activities dealing directly with the interaction between teachers and students. Instruction includes Classroom Instruction (but not including summer school and adult education), Guidance Services, Social Worker Services, Homebound Instruction, Improvement of Instruction (but not including summer school and adult education), Media Services and Office of the Principal.

Attendance and Health consists of those activities which have as their primary purpose the promotion and improvement of children's attendance at school and activities relating to all health services for public school students and employed personnel. Activities include the fields of physical and mental health such as medicine, dentistry, psychology, psychiatry and nursing services.

Pupil Transportation consists of activities concerned with conveying students to and from school, as provided by state and federal law. This includes trips between home and school, and trips to school activities. Included in the expenditures under this function are costs relating to vehicle maintenance and monitoring of the transportation process.

Operation and Maintenance Services consists of activities concerned with keeping the physical plant open, comfortable, and safe for use, and keeping the grounds, buildings, and equipment in effective working condition and state of repair. These include the activities of maintaining safety in buildings, on the grounds, and in the vicinity of schools.

School Food Services consists of activities concerned with providing food to students and staff in a school or LEA. This service area includes preparing and serving regular and incidental meals, lunches, or snacks in connection with school activities and food delivery.

Summer School expenditures consist of activities relating to the delivery and improvement of summer school activities at an LEA.

Adult Education consists of activities concerned with the delivery and improvement of adult education activities at an LEA.

Other Educational Programs consists of activities sponsored by the LEA that do not involve the delivery of instruction or other ancillary activities for the students. These activities include enterprise operations, community services and non LEA programs.

Capital Outlay consists of activities concerned with acquiring land and buildings, remodeling buildings, constructing buildings and additions to buildings, initially installing or extending service systems and other built-in equipment, and improving sites.

Debt Service consists of activities concerned with servicing the debt of the LEA, including payments of both principle and interest.

Total Balances are a calculation consisting of beginning fund balances and adding receipts and deducting expenditures.

TABLE 14

Depicts the receipts of State funds at the LEA for the major programs funded by the State. Other Funds include Pilot Studies, Magnet Regional Schools, Indian Children, Jobs for Virginia Graduates, Elementary Model School, Project Discovery, Rickover Foundation, Migrant Education-State, Adult Literacy-State, Family Life Education, Governor's School, Software Rights, Mars Room, Dropout Prevention, Magnet Regional Summer, Electronic Classroom Payments, and Software Flowthrough.

TABLE 15

Represents the cost of operations of LEAs broken down by source of support. The amount for the Total Expenditures for Operations is the total expenditures per LEA minus the amount for the Facilities (Capital Outlay) function, Debt Service and Non LEA Programs. The assumption taken by the Department is that the LEA would spend all of its State money received, all of the Sales and Use Tax money received and all of its Federal money received, before spending any of the local appropriations. Therefore, the Total Expenditures for Operations is the sum of the State portion, the Sales and Use Tax portion and the Federal portion, with the local portion being the remainder after the others have been deducted. The State amount includes all the moneys sent to the LEA by the Department minus an amount sent by the Department for the running of the Hospital, Clinics and Detention Home project and an amount sent by the Department for vocational equipment. The State Retail Sales and Use Tax is the 1 cent tax on goods and services allocated to a particular LEA. The Federal portion includes all federal funds sent to the LEA directly from the Federal government or through the State to the LEA minus an amount for capital outlay paid for by Federal funds. The Local funds portion is equal to the total expenditures for operations minus the amounts for State funds, State Retail Sales and Use Tax, and Federal funds.

TABLE 16

Represents the components used in the formula for calculating the localities composite index during the 1988-90 biennium budget period.

TABLE 17

The number of Instructional Personnel includes all teachers, guidance counselors, librarians, principals and assistant principals. Student ADM is the end-of-year unadjusted average daily membership as reported to the Department.

TABLE 18

Represents Full Time Equivalent (FTE) positions for Administrative, Service and Support personnel. FTEs are reported to the Department by the LEAs. Superintendent and Assistant Superintendent are included in the Executive Administration function. Clerical and Technical are office clerical personnel and technical personnel other than teacher aides which are reported separately. Facilities consists of all the FTEs relating site acquisition and building construction and acquisition other than clerical and technical FTEs. Attendance and Health consists of all the FTEs relating the health services provided by the LEA as well as attendance services other than clerical and technical FTEs. Pupil Transportation consists of all the FTEs relating to the conveying of students to and from school and the monitoring and maintenance of the vehicles other than clerical and technical FTEs. Operation and Maintenance consists of all FTEs relating to keeping the physical plant open, comfortable,and safe for use other than clerical and technical FTEs. Other Professional Administrative FTEs consist administrative FTEs in the administration function as well as other professional FTEs in the same administration function. Instructional Support FTEs consist of the FTEs relating to Homebound Instruction and the Improvement of Instruction functions other than clerical and technical FTEs.

TABLE 19

Represents FTE positions for elementary and secondary school principals along with the average salary for each classification and a total column for all principal FTEs and average salaries. The same procedure was done for the assistant principal positions. "Teacher" includes classroom teachers, guidance counselors, and librarians for both FTEs and average salaries and both elementary and secondary. All Instructional Positions include the teachers plus the principals and the assistant principals for both FTEs and average salaries.

Introduction

Introduction

The Department of Education is pleased to present the *1990-91 Superintendent's Annual Report*, which continues a major change in the reporting of educational statistics in the Commonwealth.

In the previous year's report (1989-90), the Virginia Department of Education combined two previous Department documents, *Facing Up*, and the *Superintendent's Annual Report*. This revised format has met with approval and results in clearer, more accessible information on Virginia's public schools.

As in the previous year, this document was prepared using the Department's team approach. Representatives from Information Systems, Assessment and Testing, Finance, Public Affairs, and others contributed to the design, content, and production of this report.

The first Superintendent's Annual Report was published in 1870 when the state's public school system began. Facing Up was first published in 1967 to provide selected statistical data about Virginia's public schools.

The first portion of this report is "Highlights from the 1991 Report on Public Education." The second portion consists of 19 statistical tables presenting information for the 1990-91 school year.

Joseph A. Spagnolo, Jr.
Superintendent of Public Instruction

The following is a synopsis of the changes made from the previous publications Facing Up and the Superintendents Annual Report:

A Decade of Progress, A Decade of Challenge

Highlights from the 1991 Report on Public Education

A Decade of Progress

Over the past decade public education in Virginia has steadily improved, thanks to the leadership of Virginia's governors, the members of the General Assembly, state superintendents of public instruction, and the active involvement of thousands of educators all across Virginia who are dedicated to moving public education forward.

After several years of decreased enrollment statewide, the number of students in our public schools has jumped to slightly more than one million for 1991. This is an increase of almost 16,000 students in just one year. They are enrolled in the 1,800 public schools across our state and are taught by almost 67,000 teachers.

We know all too well that effective educational programs cost money. In the United States, elementary and secondary education consumes more than 200 billion dollars each year. In Virginia this year, we will spend in excess of 4.5 billion dollars for students in kindergarten through grade 12.

Public education in Virginia is indeed a huge enterprise.

This is because we want the best for our children, and because we see that the future of our children—and our Commonwealth—lies in the quality of education we provide for them. And Virginia's schools have made progress over the past decade, as indicated by improved test scores, tightened teaching requirements, increased financial support, and higher school standards.

- Since 1984, state funding for public education has increased from $1.3 billion to $2.2 billion for 1991-92. This represents a 64 percent increase in state funds going to public education.
- Since 1984, the state share of the funding of the Standards of Quality has increased from an average of 50 percent to the current 55 percent.
- Funds have been allocated to encourage school divisions to provide free textbooks. This is particularly critical for those students who are least able to pay textbook fees.
- Virginia is the only state in the nation that has state-supported summer residential foreign language academies. Since 1986, over 2,000 students have participated in these nationally recognized programs. Virginia leads the nation in the percentage of our high school students taking a foreign language.
- The Governor's Schools program for gifted students is thriving and competition for enrollment is strong. Enrollment in these programs has grown three-fold since their beginning in 1973. As a result of the national attention to our programs, Virginia is hosting the 1992 National Conference on Governors' Schools.

A Decade of Challenge

Many good things have happened and are happening in Virginia's public schools. We should not lose sight of that.

Despite this progress and the financial commitments made to it, there is growing evidence that our schools are in trouble. We see:

- a dropout rate that remains too high;
- the poor performance of many of our graduates at both the undergraduate level and in the work place; and
- consequently, our lack of international competitiveness.

We need to acknowledge that the decline in student performance is not because principals and teachers do not care or are not trying their utmost to help students learn. The reality is that public education today faces many complex societal problems. By the time a young person graduates from high school, he or she has spent just 9 percent of his or her life in school. For that 9 percent of time we have children actually in the school building, we combat the stark reality of the other 91 percent of their lives. The non-school environment of a child in the last decade of the 20th century is vastly different than that of earlier generations.

The Board members have studied these problems from the perspective of education and the society at large. During the past year, Board of Education members have served on a number of commissions, task forces, and advisory groups.

In addition, over the past seven years, there have been over 300 studies addressing the perceived or real ills of public education in this country. All claim to contain solutions to the problems. From all of this, we have learned that there are absolutely no quick fixes—no easy way up or out if we are content to tinker with the current system. Simply put, our schools need fundamental, systemic changes.

A World Class Education Program

Just as we can no longer deny that our schools are in trouble, neither can we deny that we must all redouble our efforts to turn schools around. So the Board of Education is embarking on a bold initiative to provide our children with the quality education they need—an education system second to none--a world class education system for Virginia.

This is not a panacea, not a quick fix.

The initiative is encompassed in the development of a ten-year plan to give all students in Virginia a world class system of education by the year 2000. The broad outline of the plan involves basic changes that the Board believes are essential to making education better for all children.

So many other efforts at school reform have been tried and have come up short. Why, then, should we feel confident that our initiatives will succeed?

The answer is that we are not suggesting a singular solution or a "one size fits all" approach. Our ten-year program—called the World Class Education plan—is a long-range program of research, experimentation, and evaluation of results. We are going to take the things that we already know work and make sure they are in place; we are going to take new ideas and test them, experiment with them; and we are going to do basic research to evaluate them.

Our first step in the World Class Education plan is to answer a very fundamental question: what is it that all students should know and be able to do when they graduate from high school? We must clearly state a common vision of what we want our system of public education to provide for our children. In short, we must develop goals for public education. The Board has done this.

As an example of what we mean, our proposed goal statement says, in part, that:

"All graduates will be prepared to directly enter and continue in the skilled work force, or to enter and complete further academic and technical education."

As a part of this broad goal statement, we have become even more specific about what we want children to know and be able to do. Thus, we have developed a list of competencies. Fortunately, these are things we know how to measure. For example, our early draft states that all students must acquire proficiency—and proficiency levels will be set—in areas such as reading, writing, speaking, listening, problem solving skills, computer skills, mathematics, and science. Emphasis is on application of knowledge and student mastery of the subject matter. In other words, there is little point in knowing something if you do not know how to use it.

To take the goals of competencies beyond mere rhetoric, our next step is the development of a Common Core of Learning. This will identify the subject areas, skills, and attitudes to be mastered by all students. It is a simple notion, but a complex task.

How does the Common Core of Learning differ from what schools have now? It shifts the emphasis from what teachers teach to what students actually learn. We believe this shift is absolutely essential. And it is a fundamental change in the way we hold schools accountable. In the past our emphasis has been on what goes in, not what comes out of our schools. We looked at how many books we had in the library, how many dollars per pupil were spent on materials, class size limits, instructional time limits, etc. The assumption was that if schools had all these things, then children would learn. But by focusing on outcomes—that is, what our graduates actually know and can do—we will be able to measure just how effective our schools are. This is the accountability that our citizens—our taxpayers—expect, as well they should.

There are two more important differences. First, the Common Core of Learning will reflect international standards. We want our students to be able to compete with students anywhere in the world in terms of the education they are receiving. We are looking, for example, at what the Japanese are teaching, and we are making sure that our new program has standards that are as high as, or higher than, Japan. Second, for the first time, we will measure student mastery of these standards.

Our next step in the World Class Education plan is to address the issue of educational quality. It seems appropriate that ensuring that all students have an equal opportunity to master this Common Core of Learning will mean trying innovative approaches to instruction and ways of organizing schools. We have done an outstanding job of providing equal educational opportunity for all of our children with regard to the quantity of education they receive. For example, children have the opportunity to attend school the same number of years and the same number of days. We have not, however, been successful in achieving the same quality.

Thus, another key component of our World Class Education plan is the research component. This is where we explore and put in place "best practices" at demonstration sites, or local schools, across the state.

Since prevention is clearly better than remediation, we are beginning with the 4 to 8 year-olds, followed by the pre-adolescent and then the adolescent years. We have seen that education during the early years is vital to developing the love of learning and the habits necessary for success.

To improve the delivery of education to our children, the initial phase of the plan would require demonstration grants for at least 15 pilot projects in early childhood education. These grants would provide funds to enable school divisions to test new instructional practices in selected schools. These practices could include:

- Different ways of restructuring the school day.
- Teachers could try alternative teaching approaches.
- New ways to involve parents could be explored.

Our main goal is to determine what really works and why. Then our challenge will be to introduce these effective strategies, if they do not already exist. Many educators tell us that they currently do not have the information and expertise needed to develop these on their own. This is particularly true for teaching disadvantaged and minority children.

We can and, in fact, we must learn from each other.

So—in a nutshell—what is the World Class Education initiative? It is a long-range program of educational innovation, research, and evaluation that includes four components:

First: Goals will set the broad vision for the future of all of Virginia's children.

Second: The Common Core of Learning will define what we expect all students to know and be able to do.

Third: The accountability system will enable us to know when our students have successfully mastered these competencies.

Fourth: Demonstration projects will apply research and experimentation to identify effective practices for teaching and learning and will involve the parents and the community in meaningful ways in the life of their schools.

Standards of Quality

With a few exceptions, all schools and school divisions in Virginia meet the requirements of the current Standards of Quality.

One may ask how it is that the Board is saying major problems exist in our schools, but yet, for the most part, our schools meet the provisions of the Standards of Quality? The answer to this question lies in the fact that the current Standards of Quality, which drive the funding for education in Virginia and set minimum educational standards, do not reflect the existing educational needs of the children of Virginia nor, in some cases, do they reflect prevailing practices.

It was learned by the Governor's Commission on Educational Opportunity for All Virginians that the major flaw in the methods used to calculate the cost of education in Virginia is that of omission. Statewide, nearly 8,000 instructional personnel are used above those required by the Standards of Quality. These costs are paid entirely by local funds and represent nearly $1 billion each year, $900 per student and 26 percent of total school expenses. These funds are expended not only to add to the basic program because of high local aspiration, but also, and more importantly, to meet the minimum needs of the students for a good education.

In short, the current Standards of Quality must be improved and strengthened. Thus, the Board of Education has carefully reviewed the current standards and has prescribed amendments to be submitted to the 1992 session of the General Assembly.

The Budget Initiatives for 1992-94

As discussed in this report, the Board of Education has amended the current Standards of Quality, and we have set forth the plans for the World Class Education Program. The Board has also thoroughly reviewed the financial impact of both of these initiatives. As a result of careful deliberation, we have submitted to the Governor budget requests for funding these programs for the 1992-94 biennium.

These requests are in addition to the request for more than $492 million to maintain the current level of the educational program required by the present Standards of Quality and increased enrollments.

The Board in its budget deliberations sought to recommend two important directions for the future of Virginia's public schools.

First, the Board is united in its belief that we must begin a fundamental reform of the structure of our public schools. A bold but realistic course has been planned that, when implemented, will help us reach our goal of providing a world class education for all of our children by the year 2000.

Second, there can be no greater obstacle to the goal of a free society than the unequal distribution of the benefits of educational opportunities. The subject of disparity in educational programs throughout our state has weighed heavily on the Board's deliberations. While we recognize the legislature's role in the allocation of resources, we have submitted a budget plan that addresses both pupil and program inequities.

Pupil equity will be enhanced by the funding of initiatives for at-risk students and students with limited English proficiency. Program support in the form of instructional supplies for low wealth school divisions is recommended, as well as initiatives in instructional technology and distance learning designed to help balance the scales among Virginia's school divisions.

Additional initiatives directed toward disparity in capital investment for repair and replacement of school buildings, teacher recruitment incentives and regional incentive grants can all be useful in closing the gap that exists among school divisions.

It is critical to note that we are not simply asking for additional funds to continue "business as usual;" rather we want to restructure our programs by providing demonstration grants to encourage local initiatives consistent with the research and the directions set by the Board of Education. We are interested in creating change in the very structure of the education system. We are in a new era, and we need new and different ways of educating our children. Meaningful educational change must occur at the local level, school by school. These demonstration projects are vital to the creativity and partnership with local communities in the pursuit of educational reform. We want to spend money in a very different way, and we are convinced that this restructuring is absolutely necessary.

The Task Ahead

The members of the Board of Education believe this report provides tangible evidence that the movement to raise academic achievement of students is working in Virginia. Progress has been made—but more is needed. We are in a race to equip our students with the academic background so essential for coping with the rapidly changing economic and social environment in which they will live.

There are many challenges to be overcome, and this report has indicated the Board's responses to many of them. The overriding challenge, however, is to educate each child to his or her capacity, and to do so with equity and quality. World-wide competition in economic terms, and the race for survival as a nation, require nothing less. Our education system is the key to that survival.

Proposed Goals for Public Education In Virginia

The goals of public education in Virginia are based on the concept that educational excellence and equity are promoted by establishing a program that specifies a core of expectations for each and every student, supplemented with enhancement and specialization.

Schools will be prepared to receive and educate each student such that:

- all students will demonstrate competence in a core of expected outcomes;
- all students will be aware of the importance of individual and shared responsibilities to the community in an increasingly global society; and
- all graduates will be prepared to directly enter and continue in the skilled work force, or to enter and complete further academic and technical education.

Schools have a unique responsibility for achieving these goals and for making that a collaborative effort with families, businesses, and the community.

Proposed List of Competencies to be Mastered by All Students

- Proficiency in communication skills including language (reading, writing, speaking, listening) and the fine arts.
- Proficiency in problem solving and decision making, both individually and collaboratively.
- Proficiency in computer and technology skills and applications.
- Proficiency in mathematics and sciences and their applications to daily life and the work place.
- Proficiency in applying knowledge of diverse governmental, political, social, environmental, and economic systems and their interrelationships.
- Proficiency in maintaining physical, emotional, social, and psychological well-being.

The Mission of the Virginia Board of Education

The mission of the Board of Education is to ensure for all children in the Commonwealth an education that enables them to become informed and productive citizens in a democratic society. In keeping with Article VIII of the Constitution of Virginia, the Board established standards of quality, subject to revision only by the General Assembly, and exercises general supervision of the public school system.

The Board has primary responsibility and authority for establishing educational policy. To that end, the Board provides leadership and actively involves citizens and school divisions in formulating the policies necessary to meet its educational commitment.

adopted April 1990

The Vision of Education in Virginia:

Every child can learn.

Each child has unique talents which our schools must identify and develop.

The Commonwealth's most important investment in the present and in the future is to provide for all its children an education based upon excellence and equity.

Virginia Board of Education

---

[1] Listed in this table are the division-by-division and statewide results from the Virginia State Assessment Program. The results are reported in percentile equivalents of average scores; *i.e.*, the average scores (for a division or the State) are compared with the scores of a national norm group (national sample of students). A percentile equivalent of 54 indicates that the average score is higher than the scores of 54 percent of students in the national norm group and that 46% scored as well or better. The 50th percentile represents an average score for students nationwide. Test scores are not precise measurements; therefore, differences of several percentile points may not be significant.

[2] The *Cognitive Ability Tests* are designed to appraise individual differences in cognitive abilities related to school tasks.

[3] The *Iowa Tests of Basic Skills* and the *Tests of Achievement and Proficiency* are test batteries designed to measure a student's status in the major skill and content areas. The vocabulary test results are not reported for grades 4 and 8 due to the possible use of commercial test preparation materials which overlaps significantly with the test content.

[4] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[5] Bedford County data include Bedford City.

[6] Fairfax County data include Fairfax City.

[7] Greensville County data include Emporia City.

[8] Halifax County data for grades 8 and 11 include South Boston City, which has elementary students only.

[9] Rockbridge County data for grade 11 include Lexington City.

[10] Williamsburg City data include James City County.

[1] Beginning in the 1988-89 school year, dropouts are defined as pupils in grades 7-12 and ungraded pupils ages 12 and older who withdraw from school for reasons other than promotion, transfer, death, or graduation, and do not enter another school during the school year. Also included are pupils who are in attendance on the last day of the school year who fail to return to school by October 31 of the following school year, the "summer dropout." Prior to 1988-89, pupils in grade 7 and pupils who dropped out between regular term sessions (summer dropouts) were not included in the count of dropouts. The dropout rates presented for 1990-91 do not compare to rates published prior to 1988-89.

[2] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[3] Bedford County data include Bedford City.

[4] Fairfax County data include Fairfax City.

[5] Greensville County data include Emporia City.

[6] Halifax County data include South Boston City data for grades 8-12.

[7] Rockbridge County data include Lexington City data for grades 9-12.

[8] Williamsburg City data include James City County.

[1] Operations include regular day school, school food services, summer school, adult education, and other educational programs, but do not include facilities, debt service, and capital outlay additions.

[2] Sales tax amount for the fiscal year is determined by month of receipt, not month of collection.

[3] Support by sources may not equal total expenditures due to rounding.

[4] Expenditures made by the local school divisions on behalf of state operated education programs (hospitals, clinics, and detention homes) located within the local school divisions are not included in total expenditures for operations for the local school division.

[5] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[6] Bedford County data include Bedford City.

[7] Greensville County data include Emporia City.

[8] Williamsburg City data include James City County.

---

[1] As required by the Appropriations Act of the 1990 General Assembly.

[2] The 1990-92 Appropriations Act contained language which allowed those localities whose total Virginia Adjusted Gross Income was comprised of at least three (3) percent or more by non-residents of Virginia, to elect to exclude such non-resident income in computing the composite index of local ability-to-pay. The total 1987 Virginia Adjusted Gross Income excluding non-resident income was $69,008,945,998.

[3] The Local Composite Index is multiplied by .47 for the 1990-91 fiscal year, as specified in the Appropriations Act of the 1990 General Assembly. There is also a provision that a locality whose composite index multiplied by .47 exceeds .8000 shall be considered as having an index of .8000 for purposes of distributing basic aid payments.

CALCULATION OF THE COMPOSITE INDEX OF LOCAL ABILITY-TO-PAY

$$.5^* \boxed{\dfrac{\dfrac{\text{Local True Value of Real Property}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Local True Values of Real Property Statewide}}{\text{Total Average Daily Membership Statewide}}}} + .4^* \boxed{\dfrac{\dfrac{\text{Local Adjusted Gross Income}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Adjusted Gross Income Statewide}}{\text{Total Average Daily Membership Statewide}}}} + .1^* \boxed{\dfrac{\dfrac{\text{Local Taxable Retail Sales}}{\text{Local Average Daily Membership}}}{\dfrac{\text{Total Taxable Retail Sales Statewide}}{\text{Total Average Daily Membership Statewide}}}} = \text{Average Daily Membership Composite Index}$$

$$.5^* \boxed{\dfrac{\dfrac{\text{Local True Value of Real Property}}{\text{Local Population}}}{\dfrac{\text{Total Local True Values of Real Property Statewide}}{\text{State Population}}}} + .4^* \boxed{\dfrac{\dfrac{\text{Local Adjusted Gross Income}}{\text{Local Population}}}{\dfrac{\text{Total Adjusted Gross Income Statewide}}{\text{State Population}}}} + .1^* \boxed{\dfrac{\dfrac{\text{Local Taxable Retail Sales}}{\text{Local Population}}}{\dfrac{\text{Total Taxable Retail Sales Statewide}}{\text{State Population}}}} = \text{Per Capita Composite Index}$$

$$\boxed{.6667 \times \text{Average Daily Membership Composite Index}} + \boxed{.3333 \times \text{Per Capita Composite Index}} = \text{Local Composite Index}$$

*The constants (.5, .4, and .1) represent the average share of local revenues gathered from real property taxes, charges and miscellaneous revenue, and the 1 percent local option sales tax, respectively. Adjusted gross income data are used in the above formula as a proxy for the taxes derived from local charges and miscellaneous revenue because detailed information on the latter is not available. This is specified in the Appropriations Act.

[1] Instructional personnel positions include only principals, assistant principals, guidance counselors, librarians and teachers.

[2] Positions paid with state and local funds but not with federal funds.

[3] Unadjusted ADM.

[4] See Standard 1 E of the *1989-90 Standards of Quality*.

[5] Alleghany Highlands is the merger of Alleghany County and Clifton Forge City.

[6] Bedford County data include Bedford City.

[7] Fairfax County data include Fairfax City.

[8] Greensville County data include Emporia City.

[9] Williamsburg City data include James City County.

Appendix

Explanation of Tables and Columns
Fiscal year 1989-90

TABLE 1

Represents membership data reported to the Department of Education (the Department) at different points during the year. September 30 Membership is the sum of pupils present and absent on September 30 or the school day closest to September 30. End of Year Membership is the sum of the pupils present and absent on the last day of the school year.

TABLE 2

Represents pupil teacher ratios calculated under different criteria. "Teachers" represent classroom teachers, guidance counselors, and librarians. Ratio of Pupils to Instructional Personnel K-6, Pupil Teacher Ratio Grade 1, and Pupil Teacher Ratio English 6-12 are reported to the Department by the localities.

TABLE 3

Represents the number of pupils promoted as a percentage of end of the year membership. These amounts are reported to the Department by the localities.

TABLE 4

Represents the results from the Virginia State Assessment Program. Amounts are reported to the Department by the localities.

TABLE 5

Represents the number of graduates as a percentage of ninth grade membership four years earlier, and the type of diploma awarded. Also included in the table is the percentage of graduates that pursued continuing education and the type of education pursued. Amounts were reported to the Department by the localities.

TABLE 6

Represents a new table to the Superintendent's Annual Report and reflects a percentage of dropouts compared to membership in grades 7-12 as reported by the localities. The data reported to the Department is broken down by ethnic category.

TABLE 7

Represents an age/grade distribution of pupils by the age they entered the grade and the number of pupils promoted and retained by grade.

TABLE 8

Represents the number of days taught, the average daily membership, and the average daily attendance along with the percentage of attendance to membership. Average Daily Membership (ADM) is the average number of pupils belonging each day in a room, school, or school system for the period of report. ADM is determined by dividing the sum of the days present and absent of all pupils when school is in session during a given period by the number of days school is in session during this period.

TABLE 9

Represents balances, receipts and disbursements recorded on the State's records for programs in support of education in the Commonwealth. The amounts represent payments directly to the localities along with the expenditures in support of the Department, reported by program.

TABLE 10

Represents activity for the year in the Literary Fund of Virginia.

TABLE 11

Represents expenditures at both the state level and the local level for programs. Amounts at the state level represent expenditures at the Department in support of educational programs. Amounts at the local level are accumulated from the Annual School Report by functional area.

TABLE 12

Represents a breakdown of receipts at the localities as reported on the Annual School Report revenue section by major revenue classification. Balances represent the total amount of balances at the localities at the start of the fiscal year. State Sales and Use Tax is the 1 cent tax on goods and services allocated to the localities. State Funds are funds appropriated by the General Assembly and sent to the localities by the Department. Federal Funds are funds for federal programs or grants sent directly to the locality by the Federal Government or through the Department to the locality. City, County and Town Funds are local appropriations for education for operations, capital outlay, and debt service. Other Funds includes such items as tuition from private sources, food service receipts, transportation revenues, rebates and refunds, receipts from other LEAs, agencies, etc. Loans, Bonds, Etc are proceeds from bond sales, Literary Loan Fund loans and interest.

TABLE 13

Represents expenditures by functional area as reported on the Annual School Report. Administration involves activities concerned with establishing and administering policy for operating the Local Education Agency (LEA) and is comprised of Board Services, Executive Administration, Information Services, Personnel, Planning Services, Fiscal Services, Purchasing, Reprographics and Data Processing.

Instruction includes the activities dealing directly with the interaction between teachers and students. Instruction includes Classroom Instruction (but not including summer school and adult education), Guidance Services, Social Worker Services, Homebound Instruction, Improvement of Instruction (but not including summer school and adult education), Media Services and Office of the Principal.

Attendance and Health consists of those activities which have as their primary purpose the promotion and improvement of children's attendance at school and activities relating to all health services for public school students and employed personnel. Activities include the fields of physical and mental health such as medicine, dentistry, psychology, psychiatry and nursing services.

Pupil Transportation consists of activities concerned with conveying students to and from school, as provided by state and federal law. This includes trips between home and school, and trips to school activities. Included in the expenditures under this function are costs relating to vehicle maintenance and monitoring of the transportation process.

Operation and Maintenance Services consists of activities concerned with keeping the physical plant open, comfortable, and safe for use, and keeping the grounds, buildings, and equipment in effective working condition and state of repair. These include the activities of maintaining safety in buildings, on the grounds, and in the vicinity of schools.

School Food Services consists of activities concerned with providing food to students and staff in a school or LEA. This service area includes preparing and serving regular and incidental meals, lunches, or snacks in connection with school activities and food delivery.

Summer School expenditures consist of activities relating to the delivery and improvement of summer school activities at an LEA.

Adult Education consists of activities concerned with the delivery and improvement of adult education activities at an LEA.

Other Educational Programs consists of activities sponsored by the LEA that do not involve the delivery of instruction or other ancillary activities for the students. These activities include enterprise operations, community services and non LEA programs.

Capital Outlay consists of activities concerned with acquiring land and buildings, remodeling buildings, constructing buildings and additions to buildings, initially installing or extending service systems and other built-in equipment, and improving sites.

Debt Service consists of activities concerned with servicing the debt of the LEA, including payments of both principle and interest.

Total Balances are a calculation consisting of beginning fund balances and adding receipts and deducting expenditures.

TABLE 14

Depicts the receipts of State funds at the LEA for the major programs funded by the State. Other Funds include Pilot Studies, Magnet Regional Schools, Indian Children, Jobs for Virginia Graduates, Elementary Model School, Project Discovery, Rickover Foundation, Migrant Education-State, Adult Literacy-State, Family Life Education, Governor's School, Software Rights, Mars Room, Dropout Prevention, Magnet Regional Summer, Electronic Classroom Payments, and Software Flowthrough.

TABLE 15

Represents the cost of operations of LEAs broken down by source of support. The amount for the Total Expenditures for Operations is the total expenditures per LEA minus the amount for the Facilities (Capital Outlay) function, Debt Service and Non LEA Programs. The assumption taken by the Department is that the LEA would spend all of its State money received, all of the Sales and Use Tax money received and all of its Federal money received, before spending any of the local appropriations. Therefore, the Total Expenditures for Operations is the sum of the State portion, the Sales and Use Tax portion and the Federal portion, with the local portion being the remainder after the others have been deducted. The State amount includes all the moneys sent to the LEA by the Department minus an amount sent by the Department for the running of the Hospital, Clinics and Detention Home project and an amount sent by the Department for vocational equipment. The State Retail Sales and Use Tax is the 1 cent tax on goods and services allocated to a particular LEA. The Federal portion includes all federal funds sent to the LEA directly from the Federal government or through the State to the LEA minus an amount for capital outlay paid for by Federal funds. The Local funds portion is equal to the total expenditures for operations minus the amounts for State funds, State Retail Sales and Use Tax, and Federal funds.

TABLE 16

Represents the components used in the formula for calculating the localities composite index during the 1988-90 biennium budget period.

TABLE 17

The number of Instructional Personnel includes all teachers, guidance counselors, librarians, principals and assistant principals. Student ADM is the end-of-year unadjusted average daily membership as reported to the Department.

TABLE 18

Represents Full Time Equivalent (FTE) positions for Administrative, Service and Support personnel. FTEs are reported to the Department by the LEAs. Superintendent and Assistant Superintendent are included in the Executive Administration function. Clerical and Technical are office clerical personnel and technical personnel other than teacher aides which are reported separately. Facilities consists of all the FTEs relating site acquisition and building construction and acquisition other than clerical and technical FTEs. Attendance and Health consists of all the FTEs relating the health services provided by the LEA as well as attendance services other than clerical and technical FTEs. Pupil Transportation consists of all the FTEs relating to the conveying of students to and from school and the monitoring and maintenance of the vehicles other than clerical and technical FTEs. Operation and Maintenance consists of all FTEs relating to keeping the physical plant open, comfortable,and safe for use other than clerical and technical FTEs. Other Professional Administrative FTEs consist administrative FTEs in the administration function as well as other professional FTEs in the same administration function. Instructional Support FTEs consist of the FTEs relating to Homebound Instruction and the Improvement of Instruction functions other than clerical and technical FTEs.

TABLE 19

Represents FTE positions for elementary and secondary school principals along with the average salary for each classification and a total column for all principal FTEs and average salaries. The same procedure was done for the assistant principal positions. "Teacher" includes classroom teachers, guidance counselors, and librarians for both FTEs and average salaries and both elementary and secondary. All Instructional Positions include the teachers plus the principals and the assistant principals for both FTEs and average salaries.
